*Abstract:* The New Source Performance Standards (NSPS) for Surface Coating of Large Appliances apply to large appliance coating facilities. In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR Part 60, Subpart SS.

*Form Numbers:* None.

*Respondents/affected entities:* Large appliance surface coating facilities.

*Respondent's obligation to respond:* Mandatory (40 CFR Part 60, Subpart SS).

*Estimated number of respondents:* 72 (total).

*Frequency of response:* Initially, quarterly, and semiannually.

*Total estimated burden:* 7,220 (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$830,000 (per year), includes \$8,400 in annualized capital/startup and/or operation & maintenance costs.

*Changes in the Estimates:* There is an adjustment decrease in the total estimated burden as compared to the previous ICR due to an adjustment to the number of respondents expected to submit excess emissions and monitoring systems performance reports from 100 percent of respondents to 20 percent of respondents. The prior ICR included an assumption that all respondents would experience an exceedance; based on Agency knowledge and experience with the NSPS, 20 percent is more likely representative of the actual number of respondents submitting these reports. These changes resulted in an overall decrease in the labor costs.
